OBJECTIVE

I want to become a fullstack developer. To achieve that, I constantly study both professionally and English.

WORK EXPERIENCE

Freelance   6/2023 - current

Website Developer

I am participating in building a POS sales management system as a frontend developer using React.js, I work remotely full time. Besides, I also improved my backend and English communication skills.

Fostech   8/2022 - 6/2023

Website Developer

I participate in developing the company's outsourcing and product projects as a fullstack developer. I am familiar with Javascript, React.js, Node.js. Some projects I have participated in are: ecommerce, elearning, erp, crm,... helping many businesses become more convenient in the management process.

Fostech   6/2022 - 8/2022

Intern React.js

I got acquainted with the real working environment and learned a lot of experience there.
Some skills I learned are: optimizing performance, work management, optimize time.

Personal Project   4/2023 - 7/2023

POS System

Number of member: 1
Technologies: Express.js, React.js, MongoDB
Functions: CRUD categories, Inventory management, profit and revenue report, sell directly
